

# DISCOVER A COMPLETE LINE OF HOSE AND CABLE REELS.

## Hannay Reels provides advantages for every industry:

**Safety** – Our reels keep hoses and cables organized and off the ground for a safer workplace

**Increased productivity** – Quick deployment and pickup features enable seamless transitions between job sites

**Installation options** – Our reels can be truck-, trailer-, or garage-mounted, on wheels or carried by hand

**Durable design** – A heavy-duty build allows the reel to be confidently used with harsh chemicals, in rough weather elements, and while fully contracted

**Easy maintenance** – Components are easily accessible for trouble-free use and quick routine maintenance

**Custom construction** – Reels are available in any shape or size for small or large capacity hose and lengths to accommodate any application needs

## Buy A Better Reel.

### Choose a one-piece hub assembly

Fewer parts, fewer leaks

### Insist on more metal

Plastic components tend to break

### Demand sealed ball bearings

Less downtime with maintenance-free components

### Select dual frame supports

That's durability that can take harsh punishment

### Stand up to caustic environments with stainless steel options

Poor quality parts lead to corrosion

### Better resist wear and tear

A 2-coat paint system provides superior protection

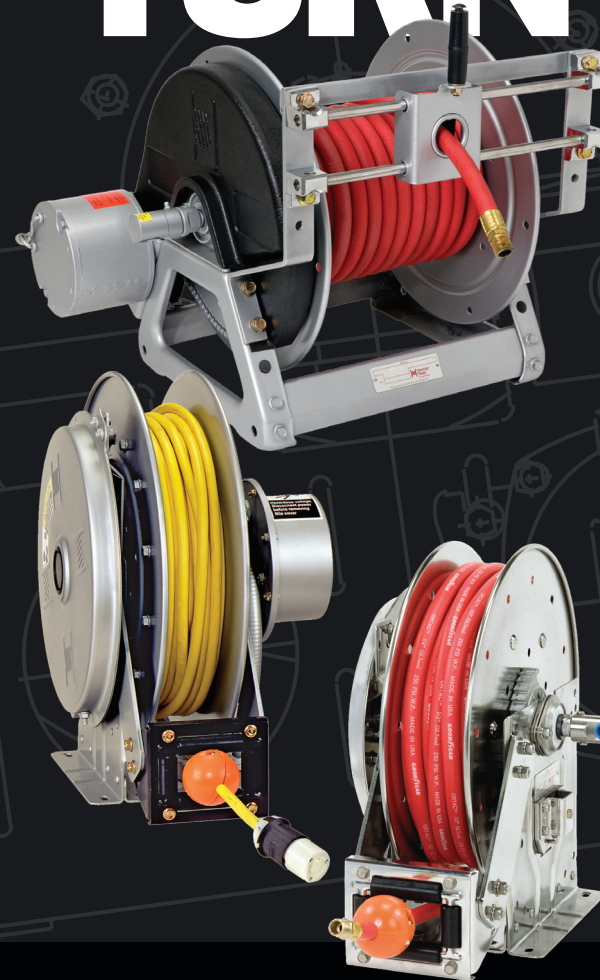

### Get the right reel the first time

Exceptional and knowledgeable customer service

# QUALITY AT EVERY TURN

 **Hannay Reels®**  
*The reel leader.*

## IT'S NOT OUR REEL, IT'S YOURS.

At Hannay Reels, we don't build standard reels to stock our own shelves. We design and build reels for real customers.

**Customers who value what we value – a job well done.**

With thousands of models and extensive custom capabilities, we have a steadfast commitment to **delivering solutions to fit your specifications for any application.**

Because of that, **nobody ever regrets buying a Hannay reel.**

# The Hannay Difference.

**Cable reels\*** feature externally mounted 3- or 4-conductor and 45-amp collector assembly for ease of serviceability; more conductors and other amperages available

**Continuous hub assembly** for superior strength

**Fully enclosed external spring motor** for easy and safe maintenance

**Optional 4-way roller and bracket** available in multiple positions

**Heavy gauge roll-formed steel drum** with full-length weld

**Continuous hub assembly** for superior strength

**Hose reels\*\*** feature a steel fluid path (stainless steel or aluminum optional) with an externally mounted 90° swivel joint for ease of serviceability. Sizes from ¼" to 4"

**Ratchet locking wheel** designed to prevent jamming and lock out

**Maintenance-free dual ball bearings** for smooth turning

**External ratchet pawl lock** for the most serviceable reel available

**Dual frame supports** for strength and rigidity

**4-way roller assembly** with dual arms for added strength

**Heavy gauge rolled-edge disc** for strength and rigidity

**304 stainless steel drum standard** for maximum corrosion resistance

**Standard steel construction** with e-coat base and oven cured enamel 2-coat finish (304 stainless steel or aluminum available)

**Riser designed to match curve of reel drum** for smoothly wrapped hose or cable

**Low maintenance chain and sprocket rewind** for reliable, smooth running operation

**Power rewind options available** (12V or 24V DC, 115V or 230V AC, compressed air or hydraulic motors)

**Manual rewind available in direct crank or geared** – can be primary or back up

**\*Spring rewind hose reels** (not shown) feature a steel fluid path (stainless steel or aluminum optional) with an externally mounted 90° swivel joint for ease of serviceability. Sizes from ¼" to 2"

**\*\*Manual/power rewind cable reels** (not shown) feature externally mounted 3- or 4-conductor and 45-amp collector assembly for ease of serviceability; more conductors and other amperages available.
